Message from the Guest Editor

Dear Colleagues,

“Efficient Sustainable Technology and Material Solutions in the Construction Industry” is the lead motif of the next Special Issue of Sustainability. This Special Issue is focused on the much-debated issues regarding the low degree of efficiency and sustainability in the construction industry.

The use of innovative methods in construction, ecological material bases, and efficient and innovation solutions is a response to an increase in construction productivity, as these innovative methods provide efficient procedures (for both construction design and completion) that increase the level of production, with better quality and faster construction.

As part of effective and sustainable solutions, new and unexplored technological and material solutions are increasingly emerging that need to be explored. This Special Issue provides a great opportunity to publish innovative approaches and research in the mentioned areas and those related to the topic.

We are looking forward to hearing from you.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
