Message from the Guest Editor

The purpose of this Special Issue is to collect research articles dedicated to the dynamic relationships among energy consumption, emissions, and the economic growth nexus. A special (but not exclusive) focus is put on the following topics:

- Modeling the dynamic casual relationships among energy consumption, emissions, and the economic growth nexus based on recently-developed econometric techniques;
- Examination of attainability/feasibility of achieving both economic development and environmental sustainability requirements;
- Use of alternative proxies of economic growth and additional pollutants, as well as controlling for potential exogenous factors in the examination of the abovementioned nexus.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
