

Impact of Various Energy Efficiency Measures on the Thermal and Energy Performance of Buildings

Guest Editor:

Dr. Ali Bahadori Jahromi

Associate Professor in Civil
Engineering, University Of West
London, UK

Deadline for manuscript
submissions:
closed (30 April 2019)

Message from the Guest Editor

Dear Colleagues,

This Special Issue includes selected articles that contribute to existing knowledge on various aspect of building energy consumption, simulation and improving the energy efficiency of buildings in light of anthropogenic global warming.

The aim of this Special Issue is to collect and present innovative research results, advancements and established methodologies directed towards improvement of building energy performance, occupants thermal comfort of buildings (residential and non-residential). In this framework this Special Issue aims at collecting contributions that include:

- Improvement in building energy efficiency (domestic, non-domestic, public and other buildings)
- Estimation and validation of energy consumption in new and existing buildings
- Strategies and technologies to improve building energy efficiency
- Renewable energy
- Heat pumps
- Heat recovery, cogeneration or tri-generation systems
- Building refurbishment and retrofitting
- Building simulation modelling

an Open Access Journal by MDPI

Editor-in-Chief

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
