Message from the Guest Editor

Non-domestic buildings are among the highest energy consumers due to the diversity and complexity of system and service end-users provided. While it is more challenging to achieve energy efficiency of the non-domestic building stock, different design approaches and methodologies have been explored. This Special Issue aims to extend the analysis on energy efficiency for non-domestic buildings, by focusing on the discussions on (but not limited to) the following key areas:

- State-of-the-art of renewable energy/low-carbon technological interventions;
- Energy-efficient passive design approaches;
- Sustainable building materials;
- Energy policy and regulations;
- Energy and performance benchmarking for large building stock;
- Experimental and simulation analysis;
- Energy demand reduction analysis;
- Methodological and analytical approach to building energy data;
- Cost-benefit/cost-effective measures and whole life cycle assessment;
- Affordability and security of future energy use in non-domestic buildings;
- Technical and financial barriers to achieving energy efficiency.

Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
