Message from the Guest Editors

The research topics in this Special Issue include, but are not limited to, the following contents:

1. The mechanisms through which energy industry development affects environmental performance;
2. Energy-saving policies, eco-innovation, and environmental performance;
3. The synergetic transformation path of energy development and energy utilization;
4. The joint governance of environmental pollution and climate change under energy management;
5. Theoretical modeling of energy management decision-making;
6. Energy efficiency and rebound effect: measurement and assessment;
7. The environmental performance assessment concerning energy inputs;
8. Renewable energy and sustainable development;
9. Low-carbon energy use: methods and paths;
10. Policy design of energy management and green transformation development;
11. Other related topics.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
