Message from the Guest Editors

This call for papers aims to present a comprehensive collection of articles introducing new visions, approaches, point of views, and methods, alongside the development of recent methodologies in the framework of entrepreneurship and co-evolution in hospitality. Moreover, the research pathway aims at validating the structure of the relationship between hospitality influence and hospitality enterprises performing within the city/country, which can be described as co-evolutionary, in such a manner that will describe the impact of related species on each other in their evolution, followed by research and surveys associated to entrepreneurship, hospitality, the co-evolution of the sector, management, and organization. All theoretical and methodological (both qualitative and quantitative) approaches are equally appreciated, and we particularly welcome multidisciplinary and interdisciplinary submissions that cover different issues relevant to strategic management, operations or marketing and provide evidence-based on the theme of the Special Issue.
