Message from the Guest Editor

The integrated nature of the environmental challenges of our time contradicts the way that policymaking processes work. Many organizations are still working separately and independently.

This Special Issue focuses on the integration of environmental concerns in energy production and natural resources development to create synergy among sectoral policies. The topics include, but are not limited to:

- Renewable and non-renewable natural resources
- Environmental impacts of energy production from renewable and non-renewable sources
- Economic development and environmental protection
- Environmental impact and risk assessment
- Energy and environmental regulation
- Sustainable management of the environment
- Air pollution and climate change
- Low carbon transportation and transportation services
- Energy use and environmental impacts of seawater desalination
- Industrial development and energy crisis
- National policies and international treaties for sustainable development

This Special Issue will bring together different perspectives on the environment, energy, and air pollution to provide data, analysis, and evidence to assist policymakers in informed decision-making.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
