School of Life Sciences, Arizona State University (Tempe, USA); Santa Fe Institute (Santa Fe, USA)

**Prof. Dr. Carlo C. Jaeger**

Global Climate Forum, Berlin, Germany

**Prof. Dr. Jürgen Renn**

Max Planck Institute for the History of Science, Berlin, Germany

Deadline for manuscript submissions:

**closed (31 July 2021)**

### Message from the Guest Editors

Dear Colleagues,

Our planet and its global societies are the ultimate complex system. Given the urgency of the planetary crises and the various threats to human and planetary well-being, the goal of this Special Issue is to marshal the recent understanding of complex co-evolutionary dynamics to design evolutionary trajectories towards sustainable and habitable futures. A co-evolutionary approach differs from traditional goal-oriented design approaches in that it does not presuppose a desired end-state, but rather accepts the genuine openness of the future. However, it does recognize boundaries—both planetary and social—that constrain possible futures as well as the fundamental principles of co-evolutionary transformation. Based on these insights, this Special Issue invites theoretical and empirical papers addressing current societal and planetary challenges, suggesting ways to initialize the required transformations as a form of co-evolutionary design for Global Futures.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
