closed (15 November 2022)

Message from the Guest Editors

Dear Colleagues,

Extreme weather and climate events and their impacts can occur in complex ways. Various anthropogenic actions can also affect the severity of events both directly and indirectly. The goal of this Special Issue is to bring together recent research and current thinking on the different effects of extreme weather and climate events on biodiversity and the sustainability of territories. With this in mind, we invite authors to submit papers that address one or more of the following topics:

Impacts on extreme weather and climate events and their interactions on biodiversity, ecological services, and socio-ecological systems;
Socio-ecological responses to extreme weather and climate events and their interactions
Mitigation, adaptation, and societal solutions for the impacts of extreme weather and climate events and their interactions on biodiversity and ecological services.

Prof. Dr. Fabio de Oliveira Roque

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
