closed (23 September 2023)

Message from the Guest Editors

Dear Colleagues,

In recent years, research on ship emissions has become a hot topic, and some techniques and theories have been accumulated in many aspects, such as ship emission measurement, emission prediction, and the assessment of ship emission reduction policies. With the arrival of the big data and artificial intelligence eras, a number of emerging technologies and theories have demonstrated significant promise in ship emissions research. This Special Issue aims to address the global issue of ship emissions and to promote communication among researchers on ship emissions.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
