Message from the Guest Editor

Sustainable agriculture promotes a balanced approach to be economically sound, socially just, and environmentally feasible for producers, consumers, and communities. Many scholars have explored, examined, and analyzed farming activities or consumer behaviors linked sustainable decisions to field management, resource allocation, or family/community health. However, studies focusing on sustainable practices performed by intermediary actors in food systems, such as collecting, inspecting, input-outsourcing, processing, packaging, transporting, pricing, marketing, and handling are very limited. This Special Issue presents a collection of articles to share innovative frameworks, strategies, applications, and assessments of sustainable agribusiness and food supply chain. A variety of topics will be covered in this collection to discuss theories, practices, and policy implications for individuals, enterprises, or networks to achieve a manageable and reasonable equilibrium of economic, social, and environmental viability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
