Deadline for manuscript submissions:

closed (28 February 2022)

Message from the Guest Editors

Dear Colleagues,

Forest bioenergy is peculiar among other renewable energy sources because it sits at the nexus of two of the main environmental crises of the 21st century: the climate and biodiversity emergencies. Certain forest bioenergy pathways may have the potential to provide part of the solution for climate change mitigation while using woody biomass produced without causing deforestation, habitat degradation, biodiversity loss.

Contribution on:

- Assess the potential impacts of forest bioenergy pathways risk identification and mitigation tools
- **Geographical scale:** all forest biomes, regional, sub-regional and national;
- **Impact categories** considered: any attribute to define Ecosystems' condition is of interest, preferably to biodiversity attributes

Types of study considered: different types of research studies are invited for this special issue, such as: Product-based LCAs; Integrated assessment models; Empirical research related to bioenergy pathways; Case-studies (empirical – modelled – literature based) at local spatial scales; Literature reviews; Policy / Governance tools and recommendations; Commentaries

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
