submissions:

closed (28 February 2023)

Message from the Guest Editors

Dear Colleagues,

Future pattern and functioning of landscapes are mostly determined by human activities regarding the past and current human and nature interactions, landscape change and vulnerability of landscapes to current and future stressors in coupled socio-ecological systems. We envisage this Special Issue becoming a cornerstone of the literature, providing a platform for researchers from all disciplines and various fields for sharing the knowledge and methodology on the main challenges, opportunities and future directions for enhancing landscape resilience and sustainability.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
