

Digital Transformation, Servitization, and Ecosystem Innovation for Sustainable Transition

Guest Editors:

Dr. Silvana Trimi

Supply Chain Management and Analytics, College of Business, University of Nebraska, Lincoln, NE 68588, USA

Dr. Hui Han

Department of Computer Science, Norwegian University of Science and Technology, Trondheim, Norway

Deadline for manuscript submissions:

12 September 2024

Message from the Guest Editors

The global business environment is turbulent even in normal times. During the past 30 years, major megatrends, especially globalization, rapid technological advances, ever-serious environmental concerns, and changing demographics, have accelerated the velocity and scale of change in the marketplace. Furthermore, some of these megatrends themselves are evolving at an increasing rate. For example, globalization has become fragmented through “slowbalization” due to geopolitical tensions (e.g., the war in Ukraine, trade war between the US and China). Recent advances in technologies, such as generative artificial intelligence, metaverse, blockchain, machine learning, and autonomous systems, are changing the way organizations create value. The COVID-19 pandemic has greatly disrupted the already chaotic situation into a polycrisis environment. In the polycrisis environment, organizations need to develop a new paradigm to survive and thrive. The important enablers of the sustainable transition include digital transformation (DT), servitization, and ecosystem innovation.

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
