Message from the Guest Editors

To tackle the impacts of natural disasters, disaster risk management remains as a key development agenda in every country, and in international forums. Recent global development agendas such as Sendai Framework for Disaster Risk Reduction (2015–2030) and UN Sustainable Development Goals 2030 (SDGs) focus on strengthening existing disaster risk management systems towards more sustainable and resilient systems. While various disaster risk management practices have been implemented around the world over the past several decades, evidence of sustainable best practices is scarce. Though some proven successful risk reduction measures are widely implemented, there are many cases of malpractice, which has led to a worsening of the effects of disasters in the long-term. To overcome the current situation, the world needs a holistic transformation of disaster risk management practices that can ensure better protection and sustainable development of both communities and natural ecosystems.

an Open Access Journal by MDPI

Editor-in-Chief

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
