Message from the Guest Editors

As a discipline with a profound interdisciplinary character, studying the complex interactions between the nature and the society, Geography can bring an important contribution to support the achievement of Sustainable Development Goals. It can offer a local to a global perspective of a variety of topics covered by the SDGs, as for example, SDG1 (No poverty), SDG2 (Zero hunger), SDG3 (Good health and well-being), SDG4 (Quality education), SDG6 (Clean Water & sanitation), SDG7 (Clean Energy), SDG11 (Sustainable cities & communities), SDG12 (Sustainable production and consumption), SDG13 (Climate), SDG14 (Life below water), SDG15 (Life on land), SDG17 (Partnerships for the goal).

In this respect, the Special Issue is focused on innovative sustainability-oriented geographical research on the topics covered by SDGs exemplified above, that explore the diverse social, environmental, economic and cultural contexts at various spatial scales.
