### Message from the Guest Editors

This call for papers for a Special Issue is a global forum that focuses on digital literacy and human beings' wellbeing. There is an increasing interconnection between the domains of digital technology and society. Digital advancements are supporting and accelerating the achievement of sustainable development in light of enhancing connectivity, financial inclusion, access to trade and public services. However, people's everyday practices with digital media have changed, and inequalities caused by the uneven diffusion of new technologies are being revealed, especially as the world is challenged with one of the biggest public health crises of the century—the COVID-19 pandemic.
