submissions:

closed (31 January 2021)

Message from the Guest Editors

This Special Issue will include papers focused on different topics related to the development of sustainable urban freight transport and the implementation of environmentally friendly solutions in city areas. The authors should focus on the influence of urban freight transport on the environment, including goods distribution in different city types, safety problems in urban freight transport, new trends in ecologistics, the development of innovative measures based on computerization of urban infrastructure, the utilization of telematics systems in urban freight distribution, and the utilization of alternative delivery systems, as well as alternatively fueled vehicles and the implementation of UFT systems based on different transport modes. Special attention will be paid to electro-mobility issues in city logistics as well as autonomous delivery systems.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
