Belgrade, 11000 Belgrade, Serbia

Deadline for manuscript  
submissions:

**closed (31 January 2023)**

### Message from the Guest Editors

Ecological composite materials, which are applicable in almost all spheres of life, represent a promising direction of research. The high percentages of CO<sub>2</sub> emissions that still occur in the production of conventional materials can be drastically reduced with better utilization of raw materials, industrial symbiosis, and the application of a circular economy.

Contributions related to the following topics are welcome:

- Development of low energy-efficient green materials;
- Advanced ecological composites;
- Long-term development of sustainable green materials;
- Eco-improved protective coatings for various applications;
- Recycled materials (in the broadest possible sense);
- Circular economy and its impact on green materials;
- Innovative composites;
- Inorganic/Organic Hybrid materials;
- Natural radioactivity of building materials;
- Thermal stability of geopolymer materials.

Research articles, case studies, review papers, and short communications are welcome. We hope that these contributions will give an overview of the best available praxis and, consequently, promote their application.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
