closed (30 June 2022)

Message from the Guest Editors

The rapid development of the industrial sector has caused a substantial surge in energy consumption, pollutant emission and waste generation, which has, in turn, triggered severe environmental repercussions—ranging from natural resource depletion to climate change. In a bid to mitigate these environmental issues, Energy Conservation and Emission Reduction (ECER) policies have been implemented in many industries. However, most ECER policies is placed on promoting energy efficiency and pollutant abatement technologies in a single industrial sector. Under such circumstances, Circular Economy (CE) approaches, such as promoting Industrial Symbiosis (IS), can enable the utilization of wastes and by-products from one industry as alternative input raw materials or fuels for another. This not only alleviates strict industrial ECER pressures but also significantly reduces the operational cost of industrial plants and saves resources.

This Special Issue will explore the industrial ECER potential in a bottom-up CE approach, by proposing the following generic topics to develop: the green development of industries and sustainable use of resources in the industrial sector.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
