Deadline for manuscript
submissions:

closed (15 December 2022)

Message from the Guest Editors

Green chemistry is a constantly evolving interdisciplinary science providing a new way of looking at organic synthesis as it reduces or eliminates the use or generation of hazardous substances, and allowing the development of new processes. Therefore, green synthesis and characterization are considered viable approaches for organic synthesis, as they are more biocompatible, inert, and environmentally safe.

Today, it is of great importance to establish more sustainable processes to reduce the use of harmful substances and cost of materials. We wish to include papers regarding various topics related to novel green techniques and their application in organic synthesis and characterization. In this Special Issue, original research articles and reviews are welcome, including both qualitative and quantitative studies as well as empirical and theoretical contributions.

Research areas may include (but are not limited to) the following:

- Process;
- Applications;
- Catalysis;
- Synthesis;
- Characterization;
- Environmental sustainability;
- Climate action.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
