Deadline for manuscript submissions:

closed (31 August 2020)

Message from the Guest Editor

Dear Colleagues,

Many households in low- and middle-income countries rely on solid fuels to meet their daily needs for cooking, lighting, and heating services. A shift towards cleaner fuels and technologies has the potential for wide ranging benefits that may include air pollution reductions at household-to-global scales, improved human health, reduced deforestation or environmental degradation, time savings, and other social effects.

This Special Issue aims to highlight interdisciplinary research and policy analysis studies that address the drivers and impacts of energy transitions in diverse settings.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
