Message from the Guest Editors

The journal *Sustainability* is devoting a Special Issue to the analysis of sustainability in the housing sector. This issue conceptualizes sustainability as maximizing the positive impacts and minimizing the negative impacts of environmental, social, ethical, and economic undertakings. The aims of this Special Issue are: (1) to provide practical, conceptual, and/or theoretical insights into the field of housing sustainability through different lenses—social, cultural, ethical, environmental, psychological, etc.; (2) to gain a deeper understanding of sustainable housing policies and practices from different perspectives; and (3) to expand and challenge the frontier of housing sustainability research by generating new knowledge, sharing innovative ideas, and identifying a new direction for future research.
