Message from the Guest Editors

The discourse on the environment and energy economics has intensified since the oil crises of 1973-75 and 1979-80, which reached a new peak following the Russia-Ukraine War that broke out in 2022. While the consequences from the crises are many, its deleterious impact on inflation and climate change have been the most devastating. Hence, economic agents are forced to contend with spiraling prices in the short run and global warming in the long run. While the role of national and international organizations have been important in containing both, global efforts by these organizations have increasingly become visible following the initiatives undertaken under the auspices of the United Nations Framework Convention for Climate Change (UNFCCC). The corollary of these developments have seen a plethora of journals and articles presenting new findings on such a critical development issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
