Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editors

Dear Colleagues,

With this Special Issue we try to compile the most recent knowledge on the use of beneficial microorganisms to improve agricultural production, putting emphasis not only on their application as biofertilizers, biofungicides, or biopesticides, but also in their help to promote plant growth through hormones or compounds. Some soil components can be up-taken by the plants in a better way with the presence of beneficial microorganisms. This point is also highlighted in this Special Issue. In addition to these traditional practices, scientists are also investigating plant breeding and engineering strategies which could potentially target a broad spectrum of pathogens or generate new disease-resistant crops.

We, therefore, invite researchers to submit papers, original research, reviews, mini-reviews, and method papers on the following topics (but not limited to):

- Beneficial microorganisms;
- Biological control of plant pathogens;
- Biofungicides;
- Plant growth promotion;
- Soil health;
- Sustainable agriculture;
- Biopesticides;
- Plant-microbe interactions;
- Genetic engineering practices in agriculture.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
