Message from the Guest Editors

This Special Issue aims to stimulate and collect state-of-the-art research on the emerging phenomena connected to the inclusion of crowds coming from inside or outside organizations' boundaries to favor the advancement of knowledge, the development of innovation, and the spawning of new entrepreneurial ventures. Indeed, thanks to the pervasiveness of information technologies, individuals are increasingly being involved in: i) open innovation and open sustainable innovation through crowdsourcing; ii) open innovation in science and crowd science by means of citizen science; and iii) alternative funding methods thanks to crowdfunding. Such crowd involvement also represents an additional strategy to better respond to the pressing grand challenges and sustainability issues we are facing today.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
