Message from the Guest Editors

Recently, new technologies on transportation are developing rapidly. The rapid evolution of techniques brings great opportunities and challenges to refine the urban transport systems. Successful implementation of intelligent transportation applications depends on multiple factors, including technical, operational, and political aspects. Designing, testing, and implementation of effective intelligent transportation applications require multi-disciplinary and emerging techniques. Meanwhile, new sensing and data resources bring opportunities for data-driven applications to better reflect the features and dynamics of urban transportation systems. The increasingly available data and the complexity of mathematical models also bring the challenge of large-scale computation. The overall objective of this special issue is to collect innovative contributions to the application of advanced transport techniques in smart cities. Proposed papers for this special issue may cover a broad range of modelling, control, design, monitoring, management, and optimization of intelligent transportation system applications, as long as the focus on emerging techniques.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
