### Message from the Guest Editors

Dear Colleagues,

Assessing sustainability in supply chain and infrastructure management is an important task for any organisation in the competitive business environment or public domain. Organisations are presently trying to develop their sustainable strategies through preparedness, response and recovery because of increased competitive, regulatory and community pressure. Sustainability in the context of supply chain implies, that companies identify, assess and manage impacts and risks in all the echelons of the supply chain considering upstream and downstream activities. On the other hand, sustainable infrastructure management can be defined as the ability of infrastructure to meet the requirements of the present without sacrificing the ability of future generations to address their needs. There is a real need to develop a meaningful and more focused understanding of sustainability in supply chain management and infrastructure management practices.

This Special Issue aims to encourage studies exploring theoretical, methodological, and practical studies related to the sustainability assessment in supply chain and infrastructure management.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
