### Message from the Guest Editors

Urban policy oriented to promote integral and sustainable urban development is an increasingly important policy domain in international and national agendas. The complexity of urban problems means policies should combine the action from different policy sectors, in order to promote comprehensive policy agendas, the participation of different kind of institutional and non-institutional actors to enhance multi-level governance processes, and the active involvement of local actors and citizens to produce an effective incorporation of local needs and demands.

This Special Issue is devoted to the analysis of this policy frame from a comparative perspective. Proposals should analyse the design, implementation and impact of this kind of urban policy. In particular, comparisons between applications in different socio-spatial contexts (countries, municipalities, neighbourhoods) are welcome, regardless of the comparative research methodology applied (qualitative, quantitative, mixed-methods, etc.)

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
