# **Intelligent Sustainable Buildings and Information Technologies**

Guest Editors:

#### Dr. Carlos Rizo-Maestre

Department of Architectural Constructions, University of Alicante, 03690 Alicante, Spain

### Prof. Dr. Mireia Luisa Sempere-Tortosa

Department of Computer Science and Artificial Intelligence, University of Alicante, 03690 Alicante, Spain

### Dr. María Dolores Andújar-Montoya

Building Sciences and Urbanism Department, University of Alicante, 03690 Alicante, Spain

Deadline for manuscript submissions:

closed (31 December 2023)

## **Message from the Guest Editors**

Dear Colleagues,

This Special Issue will focus on buildings that integrate new technologies to improve their sustainability conditions, whether they are new or existing buildings. New information technologies and the use of specialised work equipment (multi-agent systems, Internet of Things (IoT), intelligent sensors, building information modelling (BIM)) allow optimising both the construction processes and the costs associated with the building's useful life. Monitoring systems make it possible to determine the real energy behaviour of the building, which, after processing and analysing the data, can be used to establish management guidelines for achieving greater energy efficiency.

The use of all these tools turns buildings into multi-agent systems that can be controlled and optimised from their conception and throughout their complete life cycle, improving their energy consumption, impact, and even habitability by controlling temperatures and ventilation (air quality), among others. This Special Issue aims to present a collection of articles that advance sustainability as a fundamental factor for construction.

We look forward to receiving your contributions.

### **Editor-in-Chief**

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

## **Message from the Editor-in-Chief**

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas sustainability related to and sustainable development. Sustainability publishes original research articles, review articles and communications, I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering and applications of sustainability-based measures and activities.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
