

Rural Policies, Farmers' Perceptions and Planning: Enhancing Collaborative Sustainability

Guest Editor:

Dr. Alexa Lamm

Department of Agricultural Leadership, Education and Communication, University of Georgia, Athens, GA 30602, USA

Deadline for manuscript submissions:

10 December 2024

Message from the Guest Editor

Policies, both regulations and incentives, impact rural economies and the entire agri-food sector. Naturally, farmers across the globe have emotional and logical reactions to policy discussions of all types that can be used positively to enhance dialogue or result in negative consequences. This Special Issue will highlight research showcasing areas where farmers' perceptions are utilized to understand the barriers and enablers associated with political planning in support of sustainability. We welcome papers on:

- The identification of farmers' perceived political barriers and enablers of the adoption of sustainable agricultural innovations, including an evaluation of public/private partnerships and evaluations of outreach initiatives;
- Case studies that elucidate specific policy situations involving rural farming communities;
- Shared planning in the development of sustainable policy, encompassing collaboration between public and private sectors that include policy implications/interactions with rural farmers;
- Policy modelling and associated social, economic, and environmental impacts that impact the sustainability of farming in rural areas.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
