

Integrating GIS and Remote Sensing for Sustainable Water Management in a Changing Climate

Guest Editors:

Prof. Dr. Nezar Atalla Hammouri

Department of Applied Physics and Astronomy, University of Sharjah, Sharjah 27272, United Arab Emirates

Prof. Dr. Muheeb Awawdeh

Department of Earth and Environmental Sciences, Yarmouk University, Irbid 21163, Jordan.

Dr. Abdullah Al-Rawabdhah

Department of Earth and Environmental Sciences, Applied Geoinformatics Laboratory, Yarmouk University, Irbid 21163, Jordan

Deadline for manuscript submissions:

10 May 2025

Message from the Guest Editors

The integration of Geographic Information Systems (GISs) with remote-sensing technologies for sustainable water management has been revolutionized under the pressures of climate change. This Special Issue aims to explore cutting-edge research and practical applications related to these technologies and their ability to address the multifaceted challenges associated with water management. It will focus on interdisciplinary studies that implement GIS and remote sensing tools for the effective and sustainable management of water resources. The research included in this Special Issue will focus on hydrological modeling, watershed management, drought and flood monitoring, and the assessment of water quality and availability, among other areas. This Special Issue will provide a platform for the sharing of methodologies, innovative case studies, and evaluations of policies that demonstrate how these technologies could enhance water sustainability.

- GIS
- remote sensing
- sustainable water management
- climate change
- hydrological modeling
- watershed management
- drought monitoring
- flood monitoring
- water quality assessment
- water availability

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
