School of Economics and Trade, Guangdong University of Foreign Studies, Guangzhou 510006, China

Deadline for manuscript submissions:

closed (30 October 2023)

Message from the Guest Editors

High-quality development is an inevitable requirement to promote economic transformation and upgrading, following the laws of economic development. While accelerating economic development, we must take measures to strengthen the environmental governance capacity and efficiently utilize and rationally develop resources so that economic development not only adapts to the carrying capacity of resources and the environment, but also has an inexhaustible source of power, which can then accelerate sustainable development and meet new human needs. However, there are still problems within regional development, such as insufficient sustainable development momentum, weak scientific and technological innovation, low-level intensive development and resource utilization, etc.

Thus, we need to focus on cracking the key to these bottlenecks of sustainable development, incorporating carbon peaking and carbon neutrality into our overall development; promoting quality change, efficiency change and power change in economic and social development; and exploring system solutions for high-quality sustainable development.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
