submissions:

15 April 2025

Message from the Guest Editors

Dear Colleagues,

In recent years, though the concept of sustainable development has gained sufficient traction worldwide, certain questions have been raised regarding its relevance. Less developed countries (according to the criteria of the United Nations) rightly point to the fact that developed countries raise the issue of sustainability only after they have achieved a high level of development, associated with an improved standard of living of their inhabitants.

This Special Issue aims to collate papers that address the theoretical questions and practical outputs concerning cities/regions and the quality of people's everyday life. We seek to focus on the intensive development of sustainability, particularly on the "soft factors", which include quality of life and related concepts of well-being, satisfaction with life and happiness, as well as concepts of good life and good governance. These factors are irrefutably at the forefront of developing sustainable cities and regions.

We cordially invite scholars working in the domain of sustainable city development to submit their valuable manuscripts.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
