Message from the Guest Editors

Dear Colleagues,

Electric power systems can be severely damaged by natural catastrophes such as typhoons, floods, earthquakes, and tornadoes. Electric power systems are also susceptible to cyber-attacks as the operation of these systems is increasingly depending on Internet communications. Consequently, electric power systems must be resilient to offer continuous and consistent electric power supply to end customers and to ensure smart grid systems' long-term economic viability. Sustainable smart energy systems through emerging electronics and automation technologies can achieve resilience through the innovation and deployment of smart sensors, as well as enhanced information and communication infrastructure. These new novel breakthroughs have prompted substantial research efforts to address the growing demand for resilient sustainable smart grid systems.

This Special Issue aspires to be an open platform for sharing knowledge regarding advances and difficulties in resilient sustainable smart energy grid systems against natural and cyber disasters in this environment.

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
