Deadline for manuscript submissions:

6 November 2024

Message from the Guest Editors

Dear Colleagues:

In this Special Issue, research areas may include (but are not limited to) the following:

- Ecological environments
- Green construction of tunnels
- New materials and solid waste utilization in underground engineering
- Underground space environments
- Waterproof and drainage design of underground spaces
- Resource utilization of underground construction waste
- Stability control of underground engineering under complex geological conditions
- Intelligent control technology
- Intelligent early warning
- Intelligent monitoring
- Disaster prediction
- Physical and mental health of construction personnel
- Efficient and energy-saving support technology
- Green construction and operation technology

We look forward to receiving your contributions

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
