Message from the Guest Editors

Dear Colleagues,

Natural ecosystems are now being damaged by increasing urbanization and the environmental quality of cities (noise, carbon pollution, soil erosion, habitat loss, and species extinction). This phenomenon is even more worrying because the rate of urbanization has intensified globally in recent decades and will approach 75 percent by 2050. Within cities, we can find different types of urban green spaces: public and private parks, urban forests, green roofs, and street trees. Another important aspect is that cities can promote the synergy between historic art and biological culture; it is no coincidence that historic gardens and archaeological parks are biodiversity hotspots. The importance of urban greenery is also gaining increasing today because of climate events and the desire to create circular cities and implement nature-based solutions (NbSs). Green infrastructure should be integrated into urban planning and design, providing various ecosystem services such as biodiversity.

We look forward to receiving your contribution.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
