Deadline for manuscript submissions:
closed (31 March 2023)

Message from the Guest Editors

To incite and evaluate a sustainable use of the environment and its natural resources, it is indispensable to assess and monitor landscape dynamics and its effects on the provision of ecosystem services in space and time. Although research in ecosystem services is advancing rapidly, the linkages to sustainable landscape dynamics are less explored.

This Special Issue therefore invites studies advancing concepts and applications addressing the interactions between landscape dynamics and ecosystem services to indicate sustainable, nature-based solutions (NBS) inclusive the development of green infrastructure (GI). In particular, we welcome contributions that focus on past and future impacts of land-use/cover changes on ecosystem services, identification of underlying mechanisms, as well as best-practice applications to implement monitoring systems for a sustainable use of natural resources. We also would like to indicate the most relevant open research questions and future perspectives in the context of sustainable landscape dynamics and maintenance of multiple ecosystem services.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
