Message from the Guest Editor

Dear Colleagues,

The Lean and Green management and Industry 4.0 approaches have a great potential to solve future challenges a company may encounter when developing and applying its value chain and network. However, it is not clear if the Lean and Green approach will be well deployed, considering the new characteristics and programs of Industry 4.0. Lean and Green management is more focused on physical processes than on virtual and technological processes. It is still not clear how Lean and Green management should evolve to be efficient in the Industry 4.0 environment.

The purpose of this Special Issue is to gather studies revealing and discussing challenges and perspectives of Lean and Green management in Industry 4.0 on the levels of manufacturing, supply chain, value networks, companies, and industries.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
