Deadline for manuscript  
submissions:

**closed (28 February 2023)**

### Message from the Guest Editors

Sustainable Agriculture has many declinations depending on the actors involved or the specific aspects to be preserved and protected. Sustainability mainly refers to environmental and economic aspects, although the social aspects, addressed to improve life quality of the operators, together with their safety and health at work, are nowadays increasingly emphasized. Currently these are three subjects requiring more and more attention in reason of the climate changes, always in progress and, unfortunately, prone to cause extreme difficult situations in the future of our world. In the context of this Special Issue, the aim is to highlight computer applications, sensors and electronics leading to improve the sustainability of the agricultural processes, reducing the environmental impact or increasing its resilience, as well as improving animal welfare. Contributions using both the Precision farming approach (Precision Agriculture and Precision livestock farming) and the computer analysis and modeling are invited to disseminate new ideas and concepts addressed to enhance all sustainability declinations in agriculture, including organic farming approaches.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
