Deadline for manuscript
submissions:

closed (30 April 2021)

Message from the Guest Editor

This Special Issue aims at presenting life cycle assessment studies applied to three important sectors, i.e., the fashion industry, the building materials industry and the packaging industry. We welcome papers that report case studies that deal with the ecodesign of products as well as with the end-of-life of products in view of the circular economy (especially remanufacturing, reuse and recycling of the product and its components). Papers that deal with new patterns of consumption and use of products of the three underlined sectors are similarly welcome. Papers that cover not only the environmental aspects but also the economic or social ones will be well-received. For further reading, please visit the [Special Issue Website](#)

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
