Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue is to explore how local governments across different geographies plan and implement interventions as a response to pressing sustainability challenges. This may include case studies with examples from individual cities or comparative analyses across cities on a specific sustainability issue. Papers should include a critical analysis of the outcomes of these responses from local governments. Conceptual works on the role of local government across broader sustainability issues may also be considered.

Papers that do not contain a strong element on local government responses to sustainability issues or challenges will not be considered.

Dr. Christopher N.H. Doll

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
