submissions:

**28 February 2025**

### Message from the Guest Editors

The concept of creating the future in education involves the incorporation of creative methods to promote equity, inclusion, and resilience in society. In the contemporary era, where we confront challenges such as climate change, technological progress, and social divides, the significance of education in shaping the future has never been more important. Educators around the globe are aware of these weaknesses and are modifying their methodologies to better equip students for a transforming world.

Our goal in this Special Issue is to bring together a variety of works that present creative educational methods and studies that support a long-term future. By combining technological teaching strategies and policy advancements, we can revolutionize systems and effectively prepare students for the demands and opportunities of modern times. This, in turn, can pave the way for a sustainable and welcoming world.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
