

Paving the Way for Sustainability through the Use of Cork-Based Materials

Guest Editor:

Dr. Ricardo J. Alves de Sousa

Department of Mechanical Engineering, University of Aveiro, Campus Santiago, 3810-193 Aveiro, Portugal

Deadline for manuscript submissions:

8 December 2024

Message from the Guest Editor

Cork is a natural cellular material. Cellular materials have been used in many applications over the last several decades, from aerospace to construction, medicine and architecture, and are currently very popular, given their excellent cost/properties ratio. For these kinds of applications, several mechanical, thermal and acoustic properties must be taken into account.

Besides, after the rapid spread of oil-derived cellular materials such as expanded polystyrene, expanded polypropylene, EVA, etc., environmental concerns are pushing governments, consumers and producers to seek more sustainable materials. The main topics are here:

- Development of cork-based composite materials;
- Carbon footprint and life-cycle assessment of cork-based products;
- Evaluation of material properties (mechanical, thermal, acoustic, etc.);
- Study of cork materials at different length scales;
- New cork-based solutions as a sustainable alternative;
- Sustainability of the manufacturing processes of cork-based products.

We are cooperating with CSA 2023 (for more information, please click: <http://corkscience.web.ua.pt/>).

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
