Message from the Guest Editor

Dear Colleagues,

In recent years, m-learning has been widely applied to various fields and has become a popular issue in educational research. M-learning can be simply defined as the application of hand-held devices, such as smartphones, laptops, palmtop computers, and electronic readers, in order to enable learners to proceed with electronic learning anywhere and anytime, rather than limiting them to the confines of a classroom. On the other hand, those hand-held devices are basically for personal use, which can combine with some sensor technologies, such as screen touching track and GPS, to record the learning context and learning behavior along with mobility. Today, cloud computing is a prevailing technology which can help the teacher to realize the learning status in a timely manner to enhance personalized learning. Thus, fueled by technology, e-learning is entering the era of mobile and personalized learning, where those web-based paradigms or their extensions remain applicable to this trend...

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
