Message from the Collection Editors

In recent years, municipal solid waste (MSW) management has been subject to significant discussion and transformations owing to the growing attention paid to the concept of environmental sustainability all over the world. Today, all the new projects and proposals in the sector of MSW management must take into account the principles of environmental sustainability and be in agreement with circular economy perspectives. The trend is towards a deeper analysis of the sector, as demonstrated by the introduction of the 9R criteria in place of the original 3Rs and by a more detailed characterisation of the involved streams of materials.

This SI invites authors to contribute in the following fields, all in the sector of MSW (keywords):

The quali-quantitative characterisation of MSW;
Strategies for the sustainable management of MSW;
Environmental sustainability indicators;
Lifecycle assessment and risk analysis;
Business models for the circular economy and sustainability;
Green economy and MSW;
The health impact of MSW management;
The environmental impact of MSW management;
MSW management during the COVID-19 pandemic;
Education for MSW management.

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
