### Message from the Guest Editors

Mangrove forests face threats of deforestation and degradation, mainly because of their conversion to aquaculture ponds, agriculture, and urban development. These anthropogenic activities result in loss of mangrove area cover and productivity due to climate change impacts like increasing temperature, erratic rainfall patterns, and sea level rise. Therefore, proper scientific evaluation and understanding of mangrove ecology and physiology in light of the combined effects of anthropogenic and global climate change stressors is urgently needed. This Special Issue invites scientific research which will improve existing knowledge and enhance our understanding of mangrove ecosystems, thereby offering information that could be immediately useful and relevant to a large number of stakeholders.

Deadline for manuscript submissions:

**closed (31 December 2021)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
