Deadline for manuscript  
submissions:  
**closed (30 October 2022)**

### Message from the Guest Editors

This Special Issue focuses on the environmental fate of emerging chemical contaminants and provides insight into the development of emerging chemical pollution control strategies in the marine environment. The Special Issue will also highlight the existing mechanisms of sustainable pollution control and focus on recent advances in achieving a safe marine environment.

The scope includes but is not limited to the following:

1. Marine environmental fate and transport of legacy and emerging chemical pollutants.
2. Bioaccumulation, trophic transfer and biomagnification of pollutants in marine food chains and food webs.
3. Fate, transport, effects and control of persistent organic pollutants in the marine environment.
4. Marine plastic pollution, ecotoxicological impacts and control technologies.
5. Heavy metals occurrence and nanotechnological removal approaches in marine environmental compartments.
6. Marine noise pollution and control.
7. Environmental management of emerging chemical pollutants.
8. Sustainable control technologies of emerging chemical pollutants.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
