Deadline for manuscript
submissions:

22 December 2024

Message from the Guest Editors

Aquatic ecotoxicology, based on the fundamental concept of ecology, has been defined as a discipline which aims to analyze the properties and behavior of chemical stressors in aquatic ecosystems and their impact on living organisms, especially those within defined ecosystems.

This Special Issue on “Ecotoxicology in Aquatic Environments: Effects and Prevention” will focus on the latest scientific research that uses various methods, analytical techniques and approaches of identifying, characterizing and measuring toxic chemical contaminants in marine, freshwater and aquaculture species. Taking into account that no risk assessment would be possible without analytical data on food contaminants, we welcome research papers and reviews that focus on the assessment of risk to human health, applying various indices such as the estimated weekly intake (EWI), provisional tolerable weekly intake (PTWI), target hazard quotient (THQ), target risk (TR) and hazard index (HI).

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
