submissions:  
**closed (23 September 2023)**

### Message from the Guest Editors

SDGS, as developments that meet the needs of the present generation without compromising the needs of future generations, have become among the important goals of global development. In particular, in order to realize SDG, we must organically unify theory with practice and implement the institutional arrangement of the efficient utilization of natural resources.

This Special Issue will focus on managing and designing a system of natural resource utilization rights in countries around the world. In view of the current practical problems in the utilization of resources, we aim to study the system of intensive and economical utilization of resources, the clean utilization of coal resources and the development of a plan for clean energy under the ongoing energy revolution. Additionally, we aim to establish a scientific basis and practical significance for a natural resource utilization system and management system to realize the rational protection and utilization of natural resources and optimize their allocation, while accelerating the realization of SDG.

We look forward to receiving your contributions.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
